Skills

Frontend

React, Next.js, TypeScript, JavaScript,
Tailwind CSS, Framer Motion, GSAP,
Responsive Design

Backend & APIs

Node.js, Express, REST APIs, API
Integration

Database & ORM

MongoDB, PostgreSQL, Prisma

Design

Figma, UI/UX, Wireframing, Prototyping,
Design-to-Code

Tools

Git, GitHub, Vercel, VS Code, Bash/Shell,
PostHog, Browserbase/Stagehand

Education

Kwara State Polytechnic

HND, Electrical & Electronics Engineering
Kwara State, Nigeria
2024 – 2026

Lagos State Polytechnic

ND, Electrical & Electronics Engineering
Lagos, Nigeria
2019 – 2021

Anglican Mission Grammar School

West African Senior School Certificate
Ota, Ogun State
2011 – 2017

Certifications

ALX Software Engineering Programme

ALX
Software engineering, problem-solving and
collaboration

Software Development Training

Andela
Professional technology and software
development training

Product Design & UI/UX

DevCareer
Product design and technical product
development

Web Development

freeCodeCamp
Web development and programming
fundamentals

Profile

Frontend Software Engineer specializing in modern, responsive and interactive web applications. Experienced with React, Next.js, TypeScript and Tailwind CSS, with a strong foundation in UI/UX, design-to-code implementation, performance optimization and scalable frontend architecture. Combines an engineering mindset with practical product design experience to build interfaces that are visually polished, accessible, maintainable and focused on real-world usability.

Experience

Product Design Intern

DevCareer, 2023 – 2024

- Developed high-fidelity prototypes, wireframes and interactive user flows in Figma.
- Translated product designs into polished, functional web interfaces with a design-to-code workflow.
- Implemented responsive interfaces in Next.js environments.
- Collaborated on user-centered design solutions across design and engineering.

Software Engineering Intern

Holberton School / ALX, 2022 – 2023

- Built and debugged software projects through intensive, project-based technical training.
- Applied software engineering, problem-solving and system design principles to practical projects.
- Collaborated with peers in a rigorous, deadline-driven development environment.

Engineering Intern

Oluabatech Nigeria Enterprise, Lagos, 2020 – 2021

- Gained hands-on experience in technical and engineering operations.
- Applied Electrical & Electronics Engineering fundamentals to practical technical tasks.
- Developed professional communication and problem-solving skills through collaborative work.

Selected Projects

Jobbers — AI-Powered Job Discovery Platform

Full-stack AI agent that discovers technical roles through Adzuna, evaluates them against user profiles with Gemini, researches companies via Browserbase/Stagehand and generates tailored resumes.

Tech: Next.js, TypeScript, Tailwind CSS, Gemini AI, PostgreSQL

DevMentor — AI-Powered Mentorship Platform

Mentorship platform for self-taught developers with personalized learning roadmaps, code review workflows, daily check-ins and persistent mentorship context.

Tech: React, TypeScript, Tailwind CSS

Eteck — Premium Gadget E-Commerce Platform

High-performance e-commerce interface focused on speed, responsive layouts, security and a futuristic user experience.

Tech: Next.js, Tailwind CSS

LexiClear — AI Contract Intelligence Platform

Interactive interfaces for an enterprise AI platform focused on real-time risk detection and interpretation of complex legal documents.

Tech: Next.js, Prisma, AI Integration

MindFlow — SaaS Collaboration Platform

Interactive interfaces for a team collaboration and productivity platform with modern frontend architecture, state management and smooth animations.

Tech: Next.js, Framer Motion, Zustand
